PROFILE

Full Stack Software Engineer with 10+ years delivering enterprise-grade applications across insurance, logistics, and government. Deep expertise in C#/.NET Core, Java (Spring Boot), Python, Angular, and React, with strong experience in microservices, gRPC, real-time systems (SignalR), and REST/SOAP API design. Proven team lead with hands-on DevOps practice (Docker, Kubernetes, CI/CD, AWS/Azure) and recent applied GenAI work (LLMs, RAG, LangChain). Focused on measurable outcomes — e.g. improved API response times by 40% on a national logistics platform.

PROFESSIONAL EXPERIENCE

Senior Software Developer03/2025 – present

Tatweer MEA — Abu Dhabi, UAE

- Lead system design and delivery of government digital solutions using Python, .NET Core, and Angular; define architecture and technical roadmap.
- Apply GenAI in production contexts (LLMs, RAG, CVAT) to support government digital services.
- Built and deployed a Spring Boot microservices patient management system on AWS with Docker, API Gateway, and gRPC/REST integration patterns.
- Built real-time GIS dashboards (Leaflet, Mapbox, Esri ArcGIS) with SignalR live updates and high-volume marker clustering.
- Implemented CI/CD pipelines and Kubernetes deployments, reducing deployment time and failure rates.

Senior Full Stack Developer12/2023 – 03/2025

Alsager National Insurance Company (ASNIC) — Dubai, UAE

- Developed large-scale insurance systems (underwriting, policy issuance, claims) with Angular 15, .NET Core, and Oracle in a microservices architecture.
- Integrated UAE Pass, RTA, and EVG government APIs for digital authentication and e-government services.
- Led a 5-person development team; introduced automated testing and CI/CD pipelines, improving release frequency and code quality.
- Built a customer portal and internal tools automating claims and policy management, reducing manual processing.

Senior Full Stack Developer07/2022 – 11/2023

Abu Dhabi Ports — Abu Dhabi, UAE

- Designed logistics web applications (freight and warehouse services) with Angular and .NET Core.
- Improved backend performance and API response times by 40% through query tuning, caching, and asynchronous processing.
- Integrated RabbitMQ for asynchronous processing; implemented security and compliance improvements aligned with ISO standards.

Full Stack Developer10/2021 – 07/2022

Technologica — Dubai, UAE

- Delivered web applications with .NET Core 6 and Angular 13; built background services and integrated MongoDB and Node.js APIs.
- Contributed to Android app development and AI proof-of-concept features.

Software Engineer (Remote)02/2021 – 09/2021

SAMD Software Solution — Damascus, Syria

- Built Python-based 2D/3D modeling tools using PyQt5 and Panda3D in a cross-functional remote team.

Information Analyst

01/2019 – 02/2021

Syriatel Telecom — Damascus, Syria

- Developed sales and BI systems with ASP.NET, Oracle, Power BI, and OBIEE; built ETL pipelines and KPI dashboards for executive reporting.
